Education

2015: Completed Matric at
Wesbury College of Science

Bachelor of Science in Applied Mathematics (ECP)

Majored in Applied Mathematics
and Computer Science WSU
2016 - 2019 (Incomplete due to
financial reasons)

Microsoft Certified: Power BI Data Analyst Associate In-progress

Objective

A dedicated and detail-oriented individual with a strong background in Applied Mathematics and Computer Science experienced in transforming large operational datasets (69K+) into actionable insights. Leverages a unique blend of analytical rigor and hands-on experience in tech support to bridge the gap between technical operations and contextual datasets, to further drive efficiency and innovation.

Experience

Data Analyst (Business Intelligence & Reporting)

Nkqubela Technologies

August 2024- Current

Aligned project metrics with strategic business needs through meticulous objective tracking.

- Analysed and maintained primary operational dataset exceeding 69 000 records alongside secondary datasets of 20 000 and 17 000 records ensuring data integrity and availability.

Delivered timely data insights to stakeholders, effectively communicating findings to non-technical audiences.

- Provided opportunity for quick operational actions through progress and anomaly tracking.
- Delivered multi-frequency reporting:
- 3 streams of daily operational reports,
- weekly performance and QA team reports
- Monthly executive reports and presentations
- Quarterly strategic reports
- Annual HR report

Enhanced data integrity by reducing errors and implementing improved quality control processes.

- Improved data reliability by working with QA team resolving errors during collection phase, establishing regular quality checks that reduce post-processing and educating the team on end-to-end data lifecycle.
- Managed data backup protocols with administrators to reduce risk by preventing data loss.

Optimized reporting through the development and maintenance of Power BI Dashboards.

- Designed and deployed 7+ dashboards through Power BI, 1 python dashboards, improving real-time operational visibility.

Streamlined operations by collaborating with IT staff to improve system performance and maintaining detailed records of solutions and backups

Junior Tech Support
Bolder Group
May 2021- November 2023

Assisted with the installation, configuration, and maintenance of computer systems and networks.
Responded to technical support tickets and provided timely solutions to technical issues.
Conducted software and hardware troubleshooting, ensuring minimal downtime.
Assisted in the setup and deployment of new equipment and software updates.
Maintained accurate records of issues and solutions for future reference.
Collaborated with senior technicians and IT staff to improve overall system performance.
Maintained knowledge base documentation improving first-time resolution rates.

Computer Lab Assistant (Information Literacy Department)
WSU CLTD

July 2019 - October 2019

Assisted students with various software to effectively produce academic level work, including online university platforms, Microsoft Word, Excel, and PowerPoint.
Supported lecturers with various teaching and evaluation tools that improved teaching and learning.
Responsible for computer software installation, repair, and updates.
Managed tracking of new, outdated, and broken stock to prevent loss of equipment.

Lecturer Assistant

WSU
2017 - 2018

Managed appointment scheduling for lecturers.
Typed and proofread academic reports to ensure legibility.
Designed posters and pamphlets for academic events and information dissemination.

Technical Skills

- Data & Analytics:
Power BI, Excel
(advanced)
- Database
Management: SQL
Server, MySQL
- Programming
languages: Python,
Java, C++, HTML,
CSS, JavaScript
- Version Control:
GitHub
- Technologies: Power
BI, VS Code, Figma
- Office Ecosystems and
operating systems:
SharePoint, Teams,
Outlook, Power
Automate. Windows,
Linux, macOS
- Proficient in
troubleshooting and
resolving analytical,
software and hardware
issues.
- Strong understanding of
computer networks and
system administration.
- Knowledge of
programming languages
such as Python, Java,
and C++.
- Excellent problem-
solving and analytical
skills, Data validation,
Data Lifecycle
Management,
Business Intelligence
reporting, KPI
Tracking

Projects and Achievements

Website Development: Developed a website of the project, such as a software application or a network setup], demonstrating strong problem-solving skills and technical proficiency.

Database Projects

Library Management System: Design a database and front-end interface for managing library books and members.

Asset Management log: Design a database for asset record keeping.

Student Information System: Build a system to manage student records, courses, and grades.

Hobbies and Interests

- Logo and Slogan designs. Branding and Identity design.
- Coding: Adequate in HTML5, CSS, JavaScript, MySQL, C++, Java (Object Oriented programming on windows IDE and Linux Terminal) currently learning Python.
- Computer Skills: Microsoft Excel, Word and PowerPoint. Adobe Photoshop, Autodesk Sketchbook. Network Security and Big Data (Basics) through IBM.
- Reading and creative writing. Puzzle and Problem solving.

Domain Knowledge

- IT Service Management
- Web Development.

Soft Skills

- Problem Solving and Process Optimization
- Cross-functional Collaboration and communication

Leadership

Leadership ExperienceTeam Leader, Student Project Group
WSU 2018 – 2019

- Led a team of 5 students in developing a comprehensive project on on-line store ensuring timely completion and high-quality deliverables.
- Delegated tasks based on individual strengths, fostering a collaborative and efficient working environment.
- Conducted regular team meetings to monitor progress, address challenges, and provide support.

- Presented project findings to faculty and peers, receiving positive feedback and recognition for leadership and teamwork.

Event Coordinator, Tech Club WSU 2017 – 2018

- Organized and coordinated tech-related events, including workshops, guest lectures, and hackathons, enhancing the club's visibility and engagement.
- Managed event logistics, including venue booking, speaker invitations, and promotional activities.
- Collaborated with club members to develop event themes and content, ensuring relevance and value for participants.
- Achieved a 30% increase in event attendance and member participation through effective planning and execution.
